Julien Léonard

GAME DESIGNER

julien.leonard@outlook.com
linkedin.com/in/julien-leonard

SUMMARY

- Software engineer, Master's degree in computer science, DESS in video game development
- Several games developed for academic projects
- Experience in C++ and Unreal Engine 4 thanks to these projects
- Bilingual in French and English

EDUCATION

MASTER'S DEGREE IN COMPUTER SCIENCE AND VIDEO GAMES 2021 - 2022
Université de Sherbrooke, Longueuil (QC), CANADA (REMOTELY FROM FRANCE)

DESS IN VIDEO GAME DEVELOPMENT 2020 - 2021
Université de Sherbrooke, Longueuil (QC), CANADA
- C++
- Game Design
- Distributed programming, graphic programming (DirectX)
- Mathematics and physics (including PhysX)

SOFTWARE ENGINEER 2018 - 2022
INP-ENSEEIHT, Toulouse, FRANCE
- Imperative and object-oriented programming
- Mathematical optimization, operational research
- Multimedia data processing
- Neural networks

CLASSE PREPARATOIRE AUX GRANDES ECOLES (MATHEMATICS AND PHYSICS) 2016 - 2018
LYCÉE FABERT, Metz, FRANCE

BACCALAUREAT SCIENTIFIQUE FRANÇAIS 2016
LYCÉE FABERT, Metz, FRANCE
Mention « Very good », with committee praise

PROFESSIONAL EXPERIENCES

GAMEPLAY PROGRAMMER (INTERNSHIP) - MICROSOFT FLIGHT SIMULATOR SEPT. 2021 - MARCH 2022
ASOBO Studio, Bordeaux, FRANCE

RESEARCH LABORATORY INTERN JUNE - JULY 2020
Laboratoire IRIT, Toulouse, FRANCE
- Use of neural networks to generate images
- Use of image processing techniques to classify images

ACADEMIC PROJECTS

VIDEO GAMES :

PRISONNIERS DES SONGES (GAME DESIGN, GAMEPLAY PROGRAMMING) WINTER / SPRING 2021

Game developed in C++ on Unreal Engine 4. Cooperative horror puzzle game, taking place in a procedurally generated maze inhabited by a monster (AI). Video available.

HYPERSPEED RABBIT (GAME DESIGN, GAMEPLAY AND ENGINE PROGRAMMING) FALL 2020

Game developed in C++ with DirectX and PhysX in which a ship advances following a curve and must collect a maximum of coins, while avoiding the obstacles present on the way. Video available.

EDUBLOC SPRING 2019

Educative video game in Java based on ALGOBLOCS.

DEI CONSILIUM (GAME DESIGN, PROGRAMMING) SPRING 2016

Text-based video game developed in Python, based on gamebooks, with mini-games.

OTHERS :

EUROSAT SATELLITE DATA IDENTIFICATION SPRING 2020

Project in Python based on the Pytorch library (neural networks).

HIDOOP 2019 - 2020

Project in C using the main lines of the Google Hadoop project.

SKILLS

PROGRAMMATION : BLUEPRINTS, C++, C#, JAVA, PYTHON, GAMEPLAY PROGRAMMING
TOOLS : UNREAL ENGINE 4, UNITY, VISUAL STUDIO, GIT, PERFORCE
OTHERS : GAME DESIGN, GAMEPLAY, WORLD DESIGN

LANGUAGES

FRENCH : native ●●●●●

ENGLISH : C1 (*Cambridge Linguaskill Business*) ●●●●●

SPANISH : basic communication ●●○○○

OTHERS

INP MUSICAL CLUB 2018 - 2019

Member of the technical team. Lighting technician and designer for the club's musical.

GAME7 2019 - 2020

Secretary of the INP-ENSEEIHT eSports club.
